Intercoin

Overview For Investors

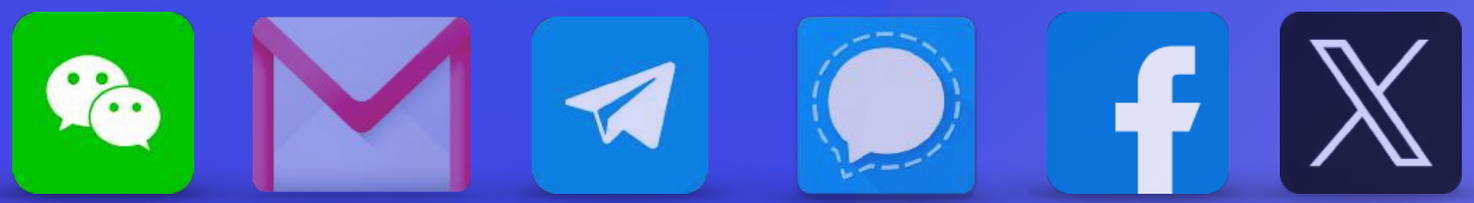
The history of personal computers
teaches us what causes a new technology
to get widely adopted and change the world.

Blockchains have been around for 15 years.

Bitcoin 2009 | Ripple 2012 | Ethereum 2015 | Polygon 2020 | Solana 2022 | Intercoin 2025

But why aren't people using them in their everyday transactions?

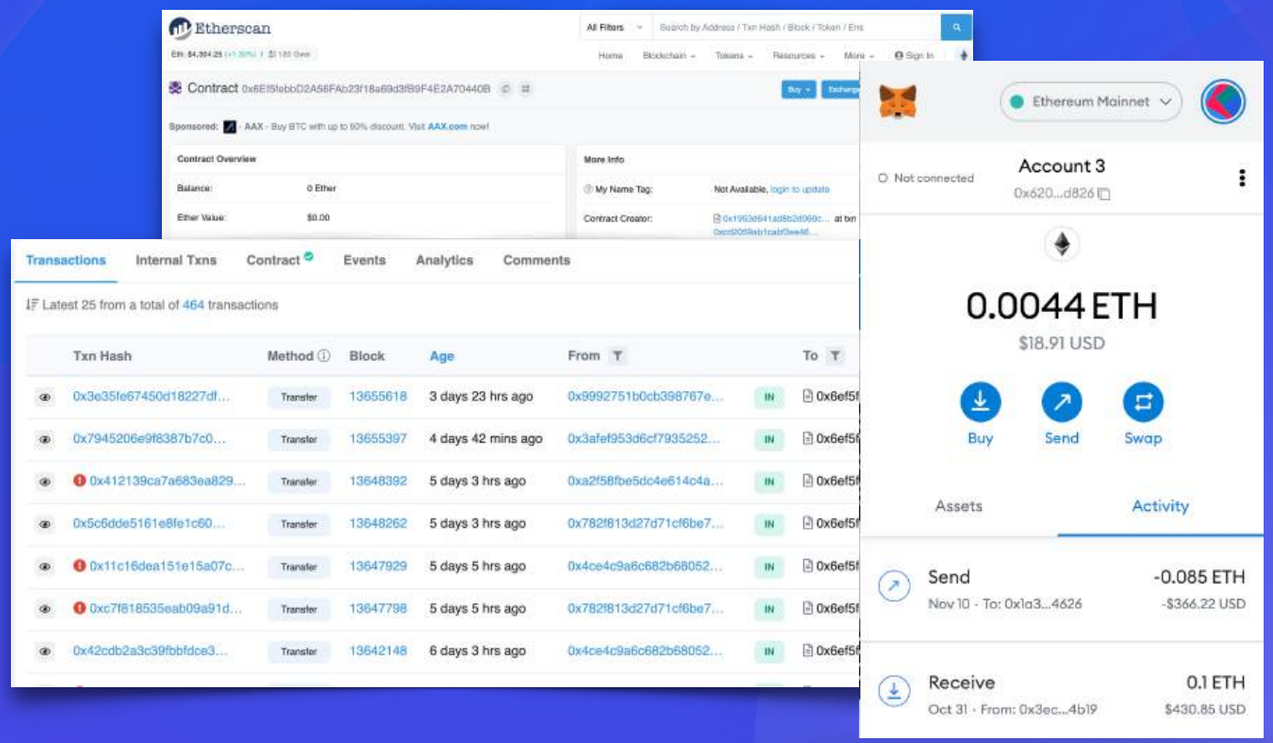
like they use these daily



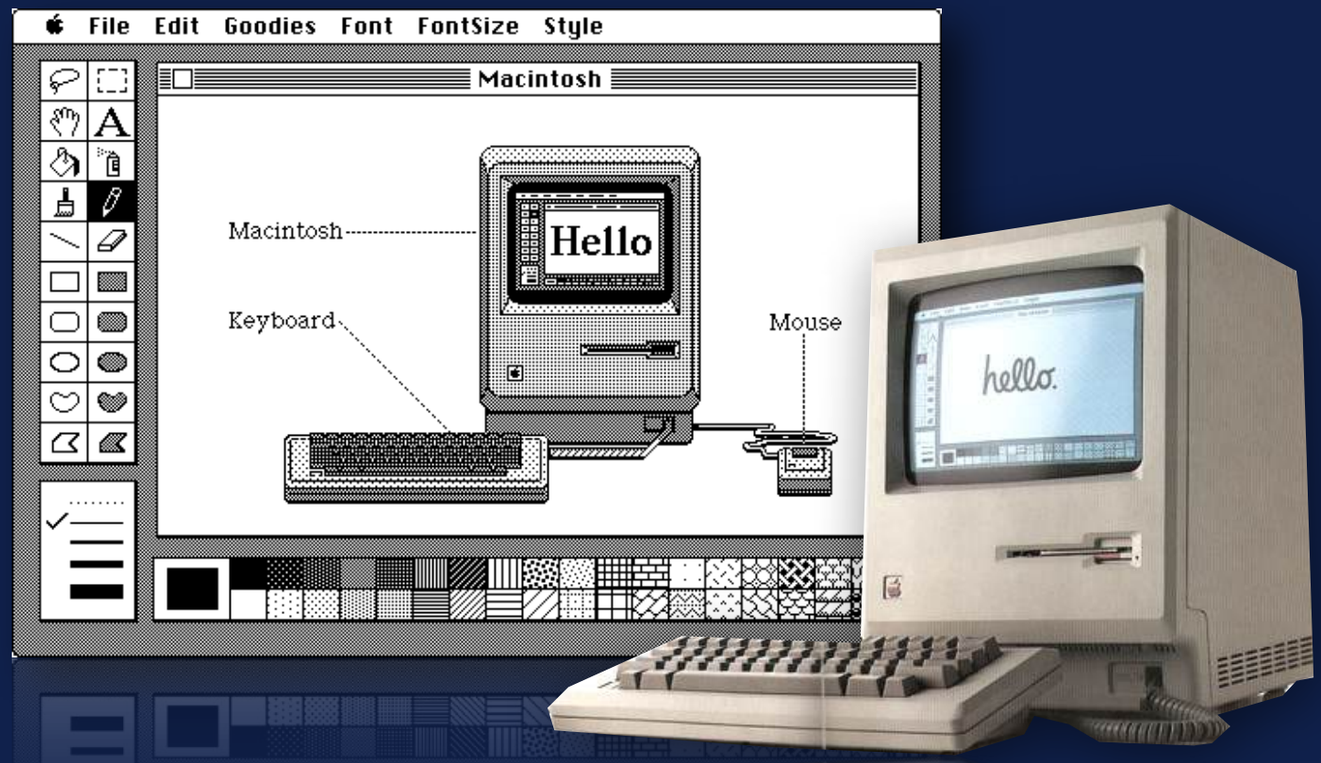
Here is one obvious problem:

It's because the user interfaces aren't

User Friendly & Social!



Windows and MacOS made computing mainstream by pioneering a graphical operating system, and user-friendly apps built on top of it.



Personal computers went from a niche market to being ubiquitous in many types of organizations when the UX became user-friendly & social.

But here is the deeper problem:

It's because the applications
were not designed for
Communities!

people just interact 1 on 1 with bots

UniSwap

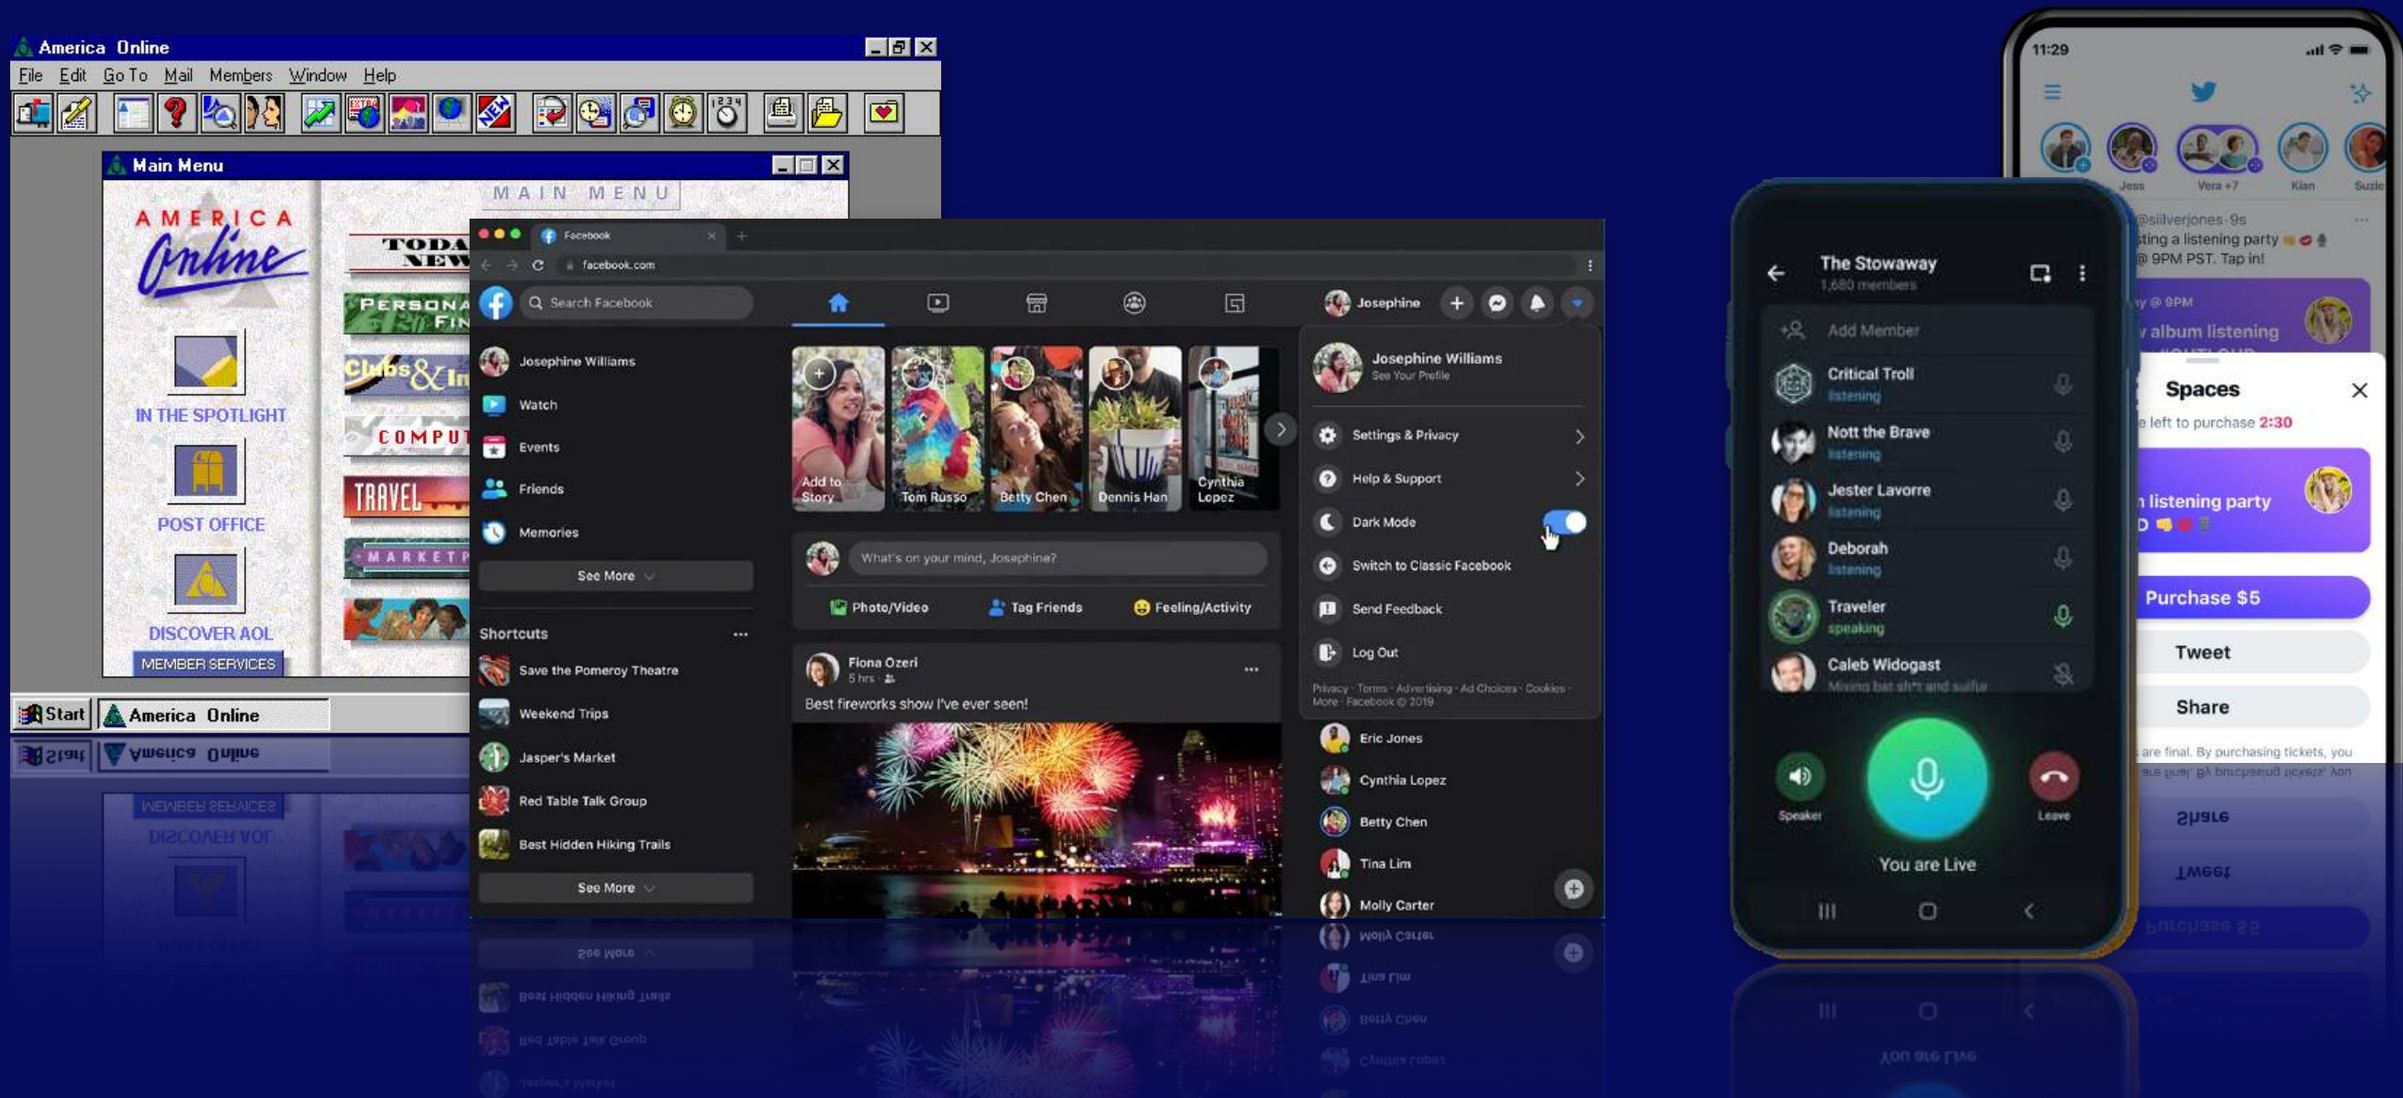
Aave

dYdX

Jupiter

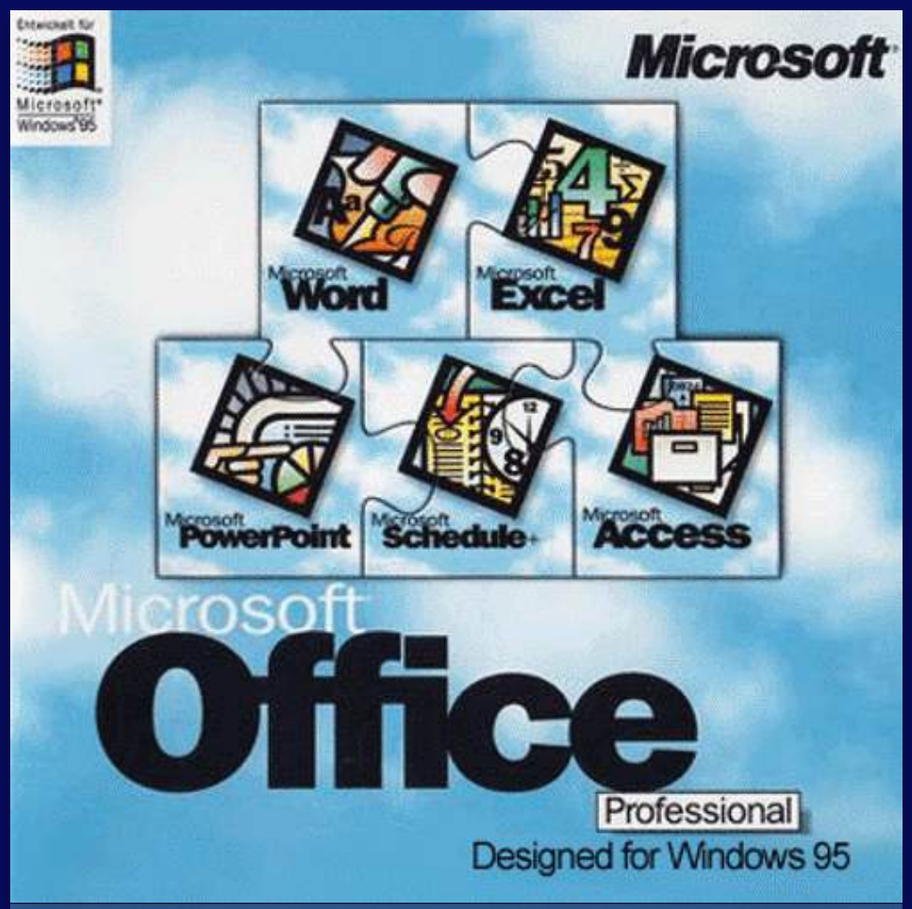
Save

AOL, Facebook, Twitter, Telegram got everyone addicted by releasing apps that connected people.



People connecting and serving one another: Money, language & culture are based in community!

Microsoft made its billions selling applications to companies & organizations of various kinds.



Their customers wanted utility and to self-organize.
That is what blockchain apps are missing today.

Community Currencies

User Interface

App Servers

Smart Contracts

Blockchain Technology

Intercoin is the Microsoft of Blockchains!

We build robust solutions that help any community raise money for their initiatives, and release their own currency.

It can be used to pay for access to events, content, membership fees, and more.

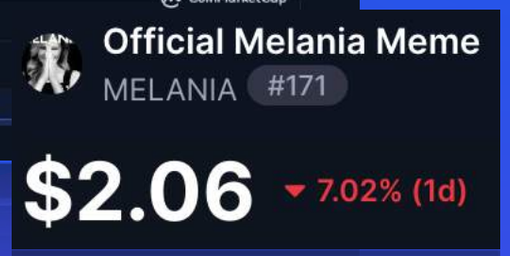
Intercoin built the blockchain equivalent of Microsoft Office

We have developed a full suite of DeFi and Governance solutions for any organization to manage money and roles in a transparent and reliable way.

This is especially useful for organizations that are globally distributed or involve many stakeholders

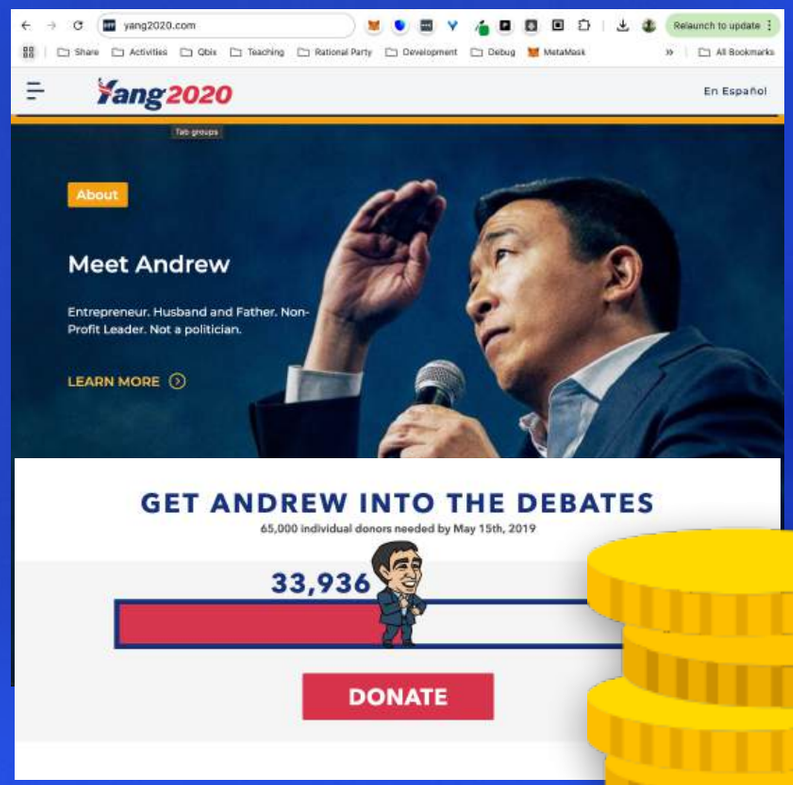
Most of today's "social" meme coins & NFTs?

They are nothing but zero-sum games.
For someone to win, someone else loses:



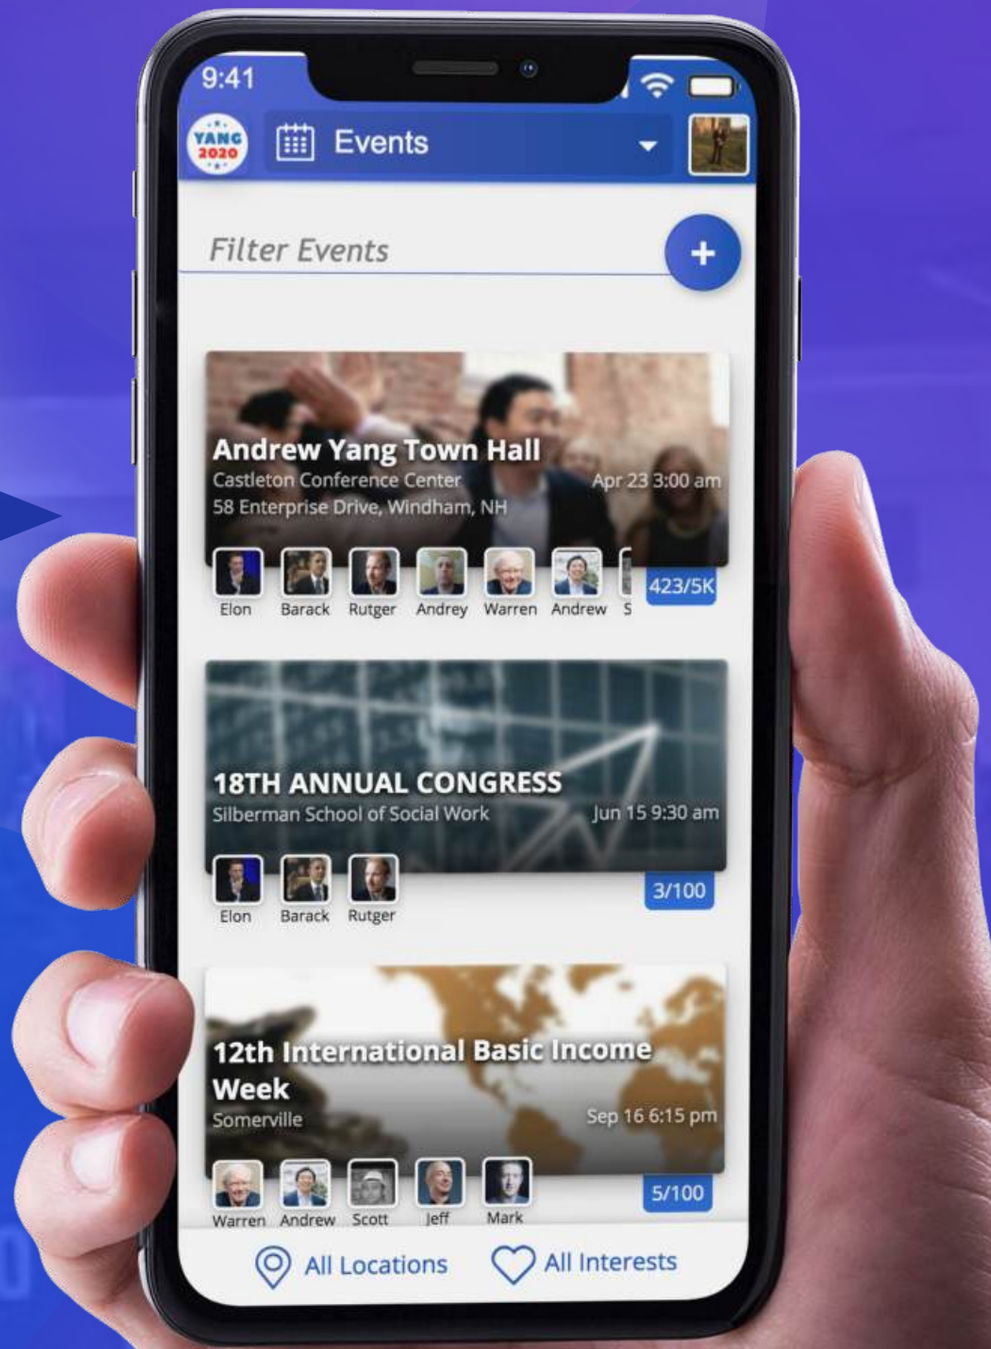
Things would've been different if MiamiCoin had been accepted as payment across Miami!

We're able to help any celebrity release their own app and currency.



Not for speculation!
For their fans to actually use.

All events and group deals in one place.



Better turnout.
Fill unsold seats.
Incentives to bring friends.
Memberships paid in your coin.

Attendees at your events could now connect within your own app, instead of ...

They can invite people into your community, and get rewarded for growing the value of your own platform instead of others' platforms.

In 2020, we helped Yang Gangs to form around the country. That was early days.

Intercoin spent years building end-to-end solutions for communities.

We work with our clients to release currencies that are useful and compliant with regulations.

Intercoin now takes care of all the details:
Technology. Tokenomics. Compliance.

This lets clients to focus on what they do best,
while their branded apps and coins help
turn their fans into an army of promoters.

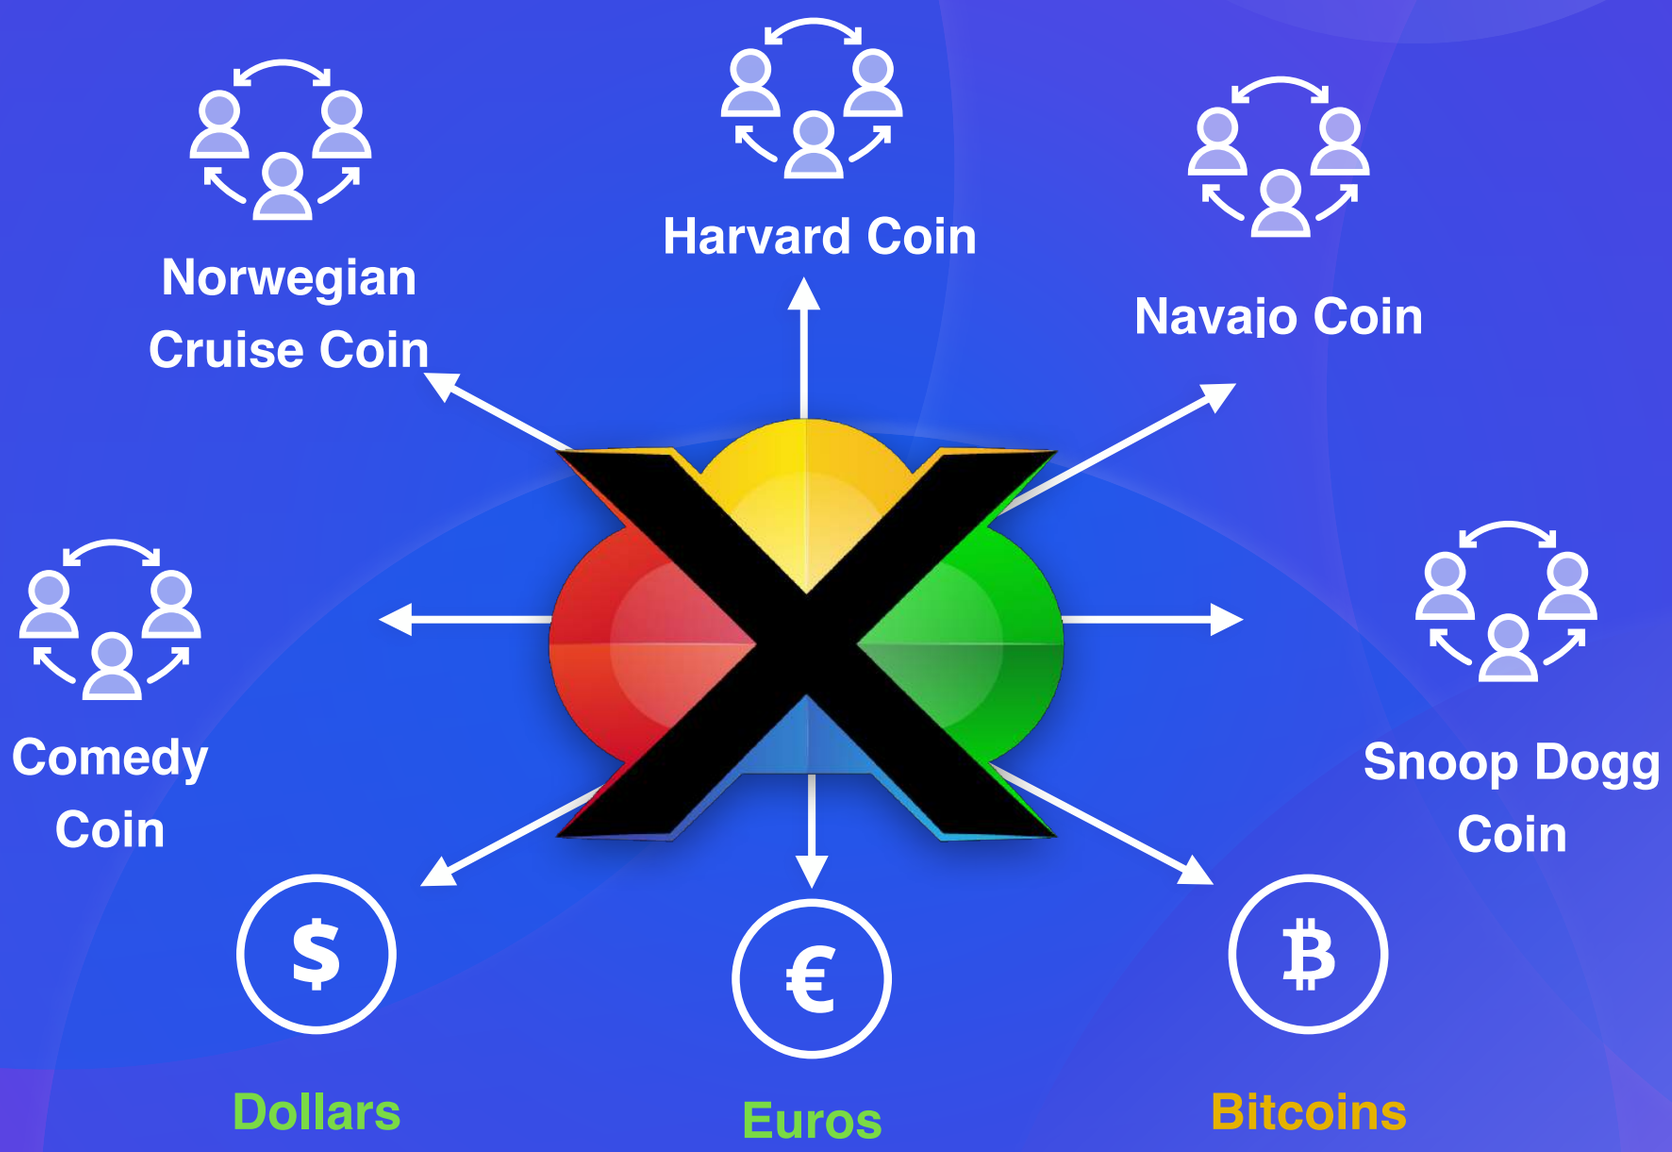
Intercoin Fundraising System

is a patent-pending solution we've begun rolling out in order to help any legitimate project successfully raise money from investors, before they launch their app and currency.

It leverages group dynamics and the latest safe harbors and regulatory exemptions, in order to build momentum and close rounds of funding successfully.

As communities promote their own currency,
they buy Intercoin X in the background to back it.



Intercoin X was architected to be like the Internet:
acting as the bridge between local currencies.

How to invest in Intercoin:

ITR

Intercoin Investor Token

We are currently raising a rolling round.

See our data room at intercoin.org/token

ITR is treated as a security, and sold under exemptions such as Regulation D, S and CF

Legal disclosures at intercoin.org/offering/PPM
